

Sumter School District, SC 2021 Realignment Study School Board Recommendations

Background

Sumter School District is in the process of a comprehensive realignment and outlined several guiding principles and criteria to evaluate when formulating options. In order to provide additional information to the committee to determine the adherence of various options to the guiding principles and criteria, the following dimensions will be summarized.

Each option was scored on the following categories:

- student impact,
- utilization score,
- average student transportation distance,
- demographic diversity score,
- feeder pattern score.

These are data points to complement existing tables and Ad-Hoc Committee deliberations and are simply meant to provide additional information. Scores are available for the existing attendance zones at SSD as well as the options developed by the Committee.

Student Impact

- Goal: identify how many students would be reassigned to a new school in the draft option.
- Students that are reassigned are summed for each option and that total is illustrated in the scoring table.

Utilization Score

- Goal: describe the extent to which an option distributes students evenly across schools to balance utilization.
- Each school receives a point value based on the difference between their utilization and the option utilization average.
 - The points are given as follows: 0-5% difference=3; 6-10% difference=2; 11-20% difference=1; greater than 20% difference=0.
 - For example, if School A has a utilization of 60% and the average for the option is 52%, that school will receive 2 points.
- To assign a score for the option, all points are added together to get a sum for the option.
 - For example, if School A through E have 1, 0, 0, 3, 2 points respectively, the score for the option would equal 6.

Average Student Transportation Distance

- Goal: measure the average distance of students living in current zones versus the options that are being considered.
- A network analysis was done using GIS in order to determine the distance that students would have to travel from home to school. Most commonly, network analyses are used to find the shortest path between an origin and destination. We employed such a technique to model transportation distances between student homes and current school zones as well as option schools, creating a network dataset that models transportation in Sumter School District, SC.
- The current and options have been ranked based on the overall average transportation distance for each grade cohort
 - Calculations are based on live-in distances of current zones vs option zones.
 - The scoring table illustrates the average student transportation distance in each DRAFT option

Demographic Diversity Score

- Goal: identify the extent to which schools represent the demographic composition of the district as a whole.
- Each school receives a point value based on the difference between their demographic distribution percent of students and the average demographic distribution percent of students' district as a whole.
 - The points are given as follows: 0-5% difference=3; 6-10% difference=2; 11-15% difference=1; greater than 15% difference=0.
 - For example, if School A has 30% Hispanic demographic of students and SSD has a district average of 17% Hispanic demographic of, then School A will receive 2 points.
- To assign a score for the option, all points are added together to get a sum for the option.

Feeder Pattern Score

- Goal: quantify the frequency of feeder pattern splits below 50% and below 25% for each draft option.
- Each school will receive a point value based on the percentage of its students that move together to the next school level.
 - The points are given as follows: 100% feeder=6; splits 50% and greater=3; splits between 25% and 49%=2; and splits 24% and below=1.
 - An Option's feeder pattern score is penalized a point for each split that occurs.
 - For example, if ES School A splits 35% into MS School A and 65% into MS School B, then ES School A will receive 4 points.
- To assign a score for the option, all points are added together to get a sum for the option.

Reference Key

Student Impact Scoring		
Option	Least	Most
Rank	1	2

Utilization Percentage Difference from District Average				
Difference	0-5%	6-10%	11-20%	>20%
Points Added	3	2	1	0

Demographic Distribution Percentage difference from District Average				
Difference	0-5%	6-10%	11-15%	>15%
Points Added	3	2	1	0

Average Student Transportation Distance		
Option	Shortest Distance	Longest Distance
Rank	1	2

Percentage of Students that Move Together to the Next School Level					
Feeder %	100%	49-99%	25-49%	< 25%	Per Split
Points Added	6	3	2	1	-1

Assessment of Options 3r & 4r: Adherence to Guiding Principles and Realignment Criteria

The table below depicts the scores for current and DRAFT options that are being considered. The following does not necessarily identify the option that is best but provides an easy-to-understand summary of all data that is being evaluated for the realignment process. The scoring table will be used as another piece of information to inform the committee and all stakeholders as we work to formulate a realignment solution for the Sumter School District.

Adherence to Guiding Principles and Realignment Criteria: Option Scores	Option		
	Current Zones	3r	4r
Elementary			
Total students impacted		533	570
Utilization score	31	37	37
Average student transportation distance in miles	3.58	3.63	3.62
Demographic diversity score	112	125	125
ES to MS feeder score	68	74	65
Middle			
Total students impacted		440	585
Utilization score	7	14	15
Average student transportation distance in miles	4.53	4.39	4.45
Demographic diversity score	55	62	62
MS to HS feeder score	42	31	28
High			
Total students impacted		2238	1413
Utilization score	4	8	8
Average student transportation distance in miles	7.5	5.99	6.35
Demographic diversity score	33	32	32

The table below depicts the ranking based on the scores for the DRAFT options that are being considered.

Adherence to Guiding Principles and Realignment Criteria: Option Rank	Option	
	3r	4r
Elementary		
Total students impacted rank	1	2
Utilization rank	1	1
Average student transportation distance rank	2	1

Utilization rank	1	1
Average student transportation distance rank	1	2
Demographic diversity rank	1	1
HS Option Rank Sum	5	5
HS Option Rank	1	1
Total Option Rank Sum	17	20
Total Option Rank	1	2

Enrollment Statistics Assumptions

The following tables present DRAFT options for the committee’s review. Keep in mind that these options are only starting points for discussion. Any of the following options can be changed based on feedback from the committee, public, and SSD administration.

Elementary School Enrollment Statistics

The tables below depict the option estimated enrollment, and estimated building utilization. The estimated enrollment is calculated based on the Sumter School District students who live within each attendance zone. There are a small number of students who's address could not be located or are out of the county, and those students are counted back at the school they currently attend. The estimates assume that schools will mostly serve students that live within each zone, and open enrollment will be limited to special considerations (i.e. programs offered at specific schools).

School	Grade Configuration	Capacity	2020-21	Option 3r	Option 4r
			Total Enrolled	Estimated Enrollment	Estimated Enrollment
Alice Drive Elementary School	K-5	1000	629	548	548
Cherryvale Elementary School	K-5	875	526	429	429
Crosswell Drive Elementary School	K-5	950	514	520	557
High Hills Elementary School	4-5	900	409	396	396
Kingsbury Elementary School	K-5	1100	655	450	450
Lemira Elementary School	K-5	825	399	476	476
Manchester Elementary School	K-5	750	361	453	453
Millwood Elementary School	K-5	925	671	563	563
Oakland Primary School	K-1	875	456	430	430
Pocalla Springs Elementary School	K-5	1200	588	617	617
Rafting Creek Elementary School	K-5	650	117	308	308
Shaw Heights Elementary School	2-3	800	446	433	433
Wilder Elementary School	K-5	925	365	466	466
Willow Drive Elementary School	K-5	1000	546	604	567
R.E. Davis College Preparatory Academy	K-8	875	383	382	382
Total		13650	7065	7075	7075

Counts based on Preliminary 2020-21 Student Enrollment.

Estimated enrollment is calculated by adding the 2020-21 Out of District/Unmatched students to their currently enrolled school, plus the total attending grade-configuration students that Live-in the school’s attendance zone per DRAFT Option.

Elementary School Utilization Statistics

School	Grade Configuration	Capacity	2020-21	Option 3r	Option 4r
			Utilization	Estimated Utilization	Estimated Utilization
Alice Drive Elementary School	K-5	1000	63%	55%	55%

Counts based on Preliminary 2020-21 Student Enrollment.

Estimated enrollment is calculated by adding the 2020-21 Out of District/Unmatched students to their currently enrolled school, plus the total attending grade-configuration students that Live-in the school's attendance zone per DRAFT Option.

Elementary School Option Impacts

The following tables depict the number of students impacted for the options. The cells colored in green reflect students who are not moved, and the cells colored in tan shows the number of students are moved, where they are currently zoned, and where they will be zoned per the option. The middle table shows a sum of all students impacted per the option.
