

Richmond Public Schools, VA Rezoning Study

Options Statistics

Revised: 10/01/2019

Enrollment Statistics Assumptions

The following document contains a series of tables and maps that depict statistics for current schools and boundaries, as well as redistricting options that are being evaluated. This information will help inform all committee members on how schools could be potentially impacted as a result of potential redistricting adjustments, along with a comparison to current school information

The following provides a general overview to the changes in Elementary School Draft Rezoning Options. It should be noted that different concepts from the options could be leveraged/combined to make a more optimal option, if the committee sees fit. The options are summarized by the following regions of the district for elementary schools:

- South:
 - Blackwell
 - Oak Grove
 - Greene
 - Broad Rock
 - Francis
 - Westover Hills
 - Swansboro
 - Elizabeth Redd
 - Miles Jones
 - GH Reid
 - Southampton
 - Fisher
- East:
 - Bellevue
 - Chimborazo
 - George Mason
 - Woodville
 - Fairfield Court
- North:
 - Overby-Sheppard
 - Barack Obama
 - Holton
 - Ginter Park
- West:
 - Carver
 - Cary
 - Fox
 - Mary Munford

Elementary Option I

Elementary Option I takes a conservative approach to rezoning, in that it only encompasses rezoning of boundaries, with no consideration of school pairing.

South: Rezoning option that affects Blackwell ES, Greene ES, Broad Rock ES, Westover Hills ES, Southampton ES, and Miles Jones ES.

East: Bellevue ES is repurposed. George Mason ES takes all of the Bellevue area, as well as some of Whitcomb court from Fairfield Court ES to effectively utilize the newly built school’s capacity. Chimborazo ES and Woodville ES are unaffected.

North: Adjustments were made between Cary, Fox, and Carver ES to balance utilization. No change to Mary Munford zone. The overcrowding that exists at Mary Munford could be resolved by reducing the number of students attending from out of zone.

West: Adjustments are made between Barack Obama ES, Holton ES, and Ginter Park ES to better balance utilization.

Elementary Option II

Elementary Option II incorporates some more moderate concepts of school pairing in addition to rezoning, with a focus on balancing utilization and helping to better diversify schools.

South: Rezoning option that affects Blackwell ES, Greene ES, Broad Rock ES, Westover Hills ES, Southampton ES, and Miles Jones ES.

East: Rezoning neighboring schools into George Mason ES, some of Whitcomb court from Fairfield Court ES, to effectively utilize the newly built school's capacity. Woodville sends a portion of Whitcomb court to Fairfield court with the objective of balancing utilization. Bellevue ES and Chimborazo ES are unaffected.

North: Barack Obama, Ginter Park and Holton all three work together to focus on balancing building utilization and improving the overall diversity of both schools. Obama and Ginter Park will both be K-2nd zones both feeding in to Holton for 3-5th grade.

West: Cary ES, Fox ES, and Binford MS will become the Binford Cluster. Fox will become K-3rd, Cary will become 4-5th, Binford MS will remain 6-8th. Carver ES, Munford ES and Hill MS will become the Hill Cluster. Munford will become 3-5th, Carver will become K-2nd, and Hill MS will become 6-8th.

Elementary Option B1

Elementary Option B1 is an additional option for the West end that incorporates some more moderate concepts of school pairing in addition to rezoning, with a focus on balancing utilization and helping to better diversify schools.

Cary and Mary Munford are paired together in this option. Munford will become K-2nd, and Cary will become 3-5th. Fox adds area from Munford ES, and loses some area to Carver ES. Carver ES also adds some of the Holton ES area.

The following provides a general overview to the changes that are being considered in Middle School Draft Rezoning Options I-II. It should be noted that different concepts from the options could be leveraged/combined to make a more optimal option, if the committee sees fit. The options are summarized by the following regions of the district for middle schools:

- | | |
|---|--|
| <ul style="list-style-type: none">• South:<ul style="list-style-type: none">○ Boushall○ New MS at Hull Street○ Brown○ Thompson | <ul style="list-style-type: none">• North:<ul style="list-style-type: none">○ MLK Jr.○ Binford○ Hill |
|---|--|

Middle School Option I, and II

Middle School Options I, and II are more moderate concepts with a focus on balancing utilization and helping to better diversify schools.

South: Thompson MS is repurposed, and attendance boundaries are rezoned to balance utilization among all of the southern middle schools as well as align feeder patterns.

North: Rezoning that affects all schools north of the river. All schools send/receive area to accomplish a balance of utilization. MLK Jr. MS no longer extends south of the river in both options.

The following provides a general overview to the changes that are being considered in High School Draft Rezoning Options I-II. It should be noted that different concepts from the options could be leveraged/combined to make a more optimal option, if the committee sees fit. The options are summarized by the following regions of the district for high schools:

- | | | |
|--|--|---|
| <ul style="list-style-type: none">• South:<ul style="list-style-type: none">○ Wythe○ Huguenot | | <ul style="list-style-type: none">North:<ul style="list-style-type: none">○ Thomas Jefferson○ Marshall○ Armstrong |
|--|--|---|

High School Option I, and II

High School Options I, and II take a conservative approach to rezoning, in that it only encompasses rezoning of boundaries, with no consideration of school pairing, closures, or consolidation.

South: Overcrowding persists south of the river at the high school level, and forecasts show overcrowding to worsen in the next 10-years. There is rezoning among the high schools south of the river, but mostly done to align feeder patterns.

North: Rezoning that affects all schools north of the river. All schools send/receive area to accomplish a balance of utilization. Armstrong extends into more area south of the river to align with feeder patterns, but does not include Hillside Court as was included in prior DRAFT Options. For most High School zones, you will see that Elementary adjustments made carry to middle, then to high school, and common zone lines can be seen.

Overview of Grade Configuration Changes

Elementary School	2018-19 Grade Config	Option II Grade Config
Barack Obama Elementary	K-5th	K-2nd
George W. Carver Elementary	K-5th	K-2nd
Ginter Park Elementary	K-5th	K-2nd
John B. Cary Elementary	K-5th	4-5th
Linwood Holton Elementary	PK-5th	3-5th
Mary Munford Elementary	K-5th	3-5th
William Fox Elementary	K-5th	K-3rd
Total		

Schools with the same colored cells are paired together.

Option B1 West: Overview of Grade Configuration Changes

Elementary School	2018-19 Grade Config	Option B1 Grade Config
John B. Cary Elementary	K-5th	3-5th
Mary Munford Elementary	K-5th	K-2nd
Total		

Schools with the same colored cells are paired together.

Student counts are based on the 10/31/2018 RPS student database.

HS Option Impacts

The cells colored in green reflect live-in students who are not moved, and the cells colored in tan show the number of live-in students that are moved, where they are currently zoned, and where they will be zoned per the concept. The first table shows a sum of all students impacted per the concept.

Total	67%	67%	67%

Economically Disadvantaged data is based of of the total K-12 Live-In in each Planning Block.
 Student counts are based on the 10/31/2018 RPS student database.

Glossary of Terms

Capacity -the number of students that an individual school has the physical capacity to enroll and can be reasonably accommodated in a facility.

Utilization - Utilization is the enrollment divided by the capacity, described as a percentage.

Live-in students - Students residing inside of a school attendance boundary, regardless of where that student attends school.

Live and Attend-in students - Students that live inside a school attendance boundary, and attends that school.

Live-out Attend-in students - Students that live outside of the 2018-19 attendance boundaries for the school that they attend, but attend that school.

Out of District students - Students that live outside of the Richmond Public Schools boundary.

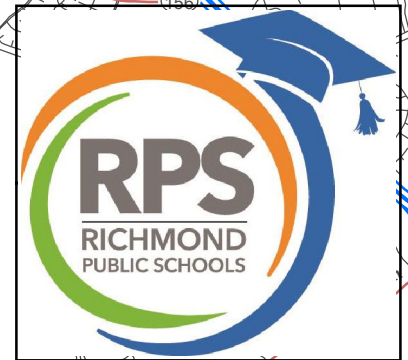

Unmatched students - Students whose address was not able to be located by the GIS.

Estimated Enrollment - Estimated Enrollment is calculated by adding the Live and Attend-in students plus the Live-Out Attend-In, Out of District, and Unmatched students.

Option Impact - The number of Live and Attend-In students that change attendance boundaries from the 2018-19 attendance boundaries given each option. In other words, an estimate of the total number of students that could be impacted per any of the options.

Feeder Pattern - The number of students living within the attendance boundary of both a lower grade cohort (ex. Elementary schools) and a higher grade cohort (i.e. Middle School). This is given as both the number of Live and Attend-in students, and described as a percentage.
