

WEST WARWICK PUBLIC SCHOOLS

2026-27 OPTIONS ANALYSIS

Introduction

The following document contains a series of tables depicting statistics for the current elementary schools and the DRAFT attendance-boundary options under evaluation. This information is intended to help the Internal Planning Team and other stakeholders understand how enrollment, utilization, demographics, and student impacts could change under each option.

Current enrollment information is based on the district's 2026-27 student data. For future elementary-school assignment purposes, it is assumed that fifth-grade students will return from John F. Deering Middle School to their local elementary schools; Maisie E. Quinn School will convert to a traditional PK-5 elementary school; and Greenbush, John F. Horgan, and Wakefield Hills Elementary Schools will serve grades K-5. Implementation of new attendance boundaries is anticipated for the 2027-28 school year.

For estimated K-5 enrollment calculations, current K-4 Out-of-District/Unmatched elementary students are assumed to remain at their currently enrolled elementary schools. Fifth-grade Out-of-District/Unmatched students currently attending John F. Deering Middle School are assumed to attend Wakefield Hills Elementary School.

The options shown are DRAFT starting points for review and may be modified based on feedback from the Internal Planning Team, district administration, School Committee, and community.

Glossary of Terms

Capacity - The number of students a school facility can reasonably accommodate, as supplied by the district.

Utilization - Total enrollment divided by capacity, expressed as a percentage.

Live In - Students living inside a school's attendance boundary, regardless of the school they attend.

Live and Attend In - Students who both live inside a school's attendance boundary and attend that school.

Live Out/ Attend In - Students attending a school but living outside its attendance boundary, including other school zones and outside the district.

Out of District (OoD) - Students living strictly outside the district boundary.

Unmatched - Students whose required location or school match could not be resolved; included in estimates only when assigned under the selected method.

Estimated Enrollment - Live In + OoD + Unmatched, or Live and Attend In + Live Out / Attend In + Unmatched, according to the selected method.

Student Impact - A represented student's geographic school assignment changes between the current boundary and an option boundary.

Feeder Pattern - The share of the applicable student population assigned from an upstream school zone to each downstream zone.

Utilization / Percentage Color Key

Colors compare each school with the same table's study-area total, not with 100% capacity. Demographic percentages use the same rule when reported. Gray total rows are the reference.

Current Enrollment

Current tables report 2026-27 school year official enrollment and utilization, while option tables report estimated enrollment for K-5. Utilization is calculated against the capacity supplied in the planning snapshots.

Current ES Enrollment and Utilization									
School	Total Capacity	K	1	2	3	4	Actual Total Enrollment	+/- Seats	Actual Utilization
Greenbush ES	359	84	86	78	85	66	399	+40	111.1%

Student Impacts

The student impact tables compare current and option attendance assignments for K-5. Green rows identify the same assignment, while beige rows identify a changed assignment; Student Count is the number of live-in students represented by that boundary relationship.
